Subject: Address Search Request

Tom: Thanks again for helping me get IPC out - we sent it to DOJ today. I am also working on the Skinner Landfill Site with Sherry Estes and we recently sent a liability package to certain PRPs who sent waste to the Chem-Dyne SF Site. The idea is that waste was transhipped from Chem-Dyne to Skinner and we now want those Chem-Dyne PRPs to participate in the ongoing ADR for the remedial action at Skinner. However, we are missing addresses for the following PRPs:

1) Ludlow (we sent a mailing to Ludlow VT, but it came back and the post master said he had never heard of a Ludlow Corp.)

2) AMF

3) Allied Signal

4) Diamond (possibly Diamond Shamrock, but unsure. The Skinner site is outside of Cincinnati, Ohio, so the Cincinnati vicinity is probably the place to begin looking)

Sherry and I would like to get the liability evidence to these PRPs as quickly as possible. Towards that end, it would be most helpful if someone from your staff could help find out if these companies exist, and their current address. Thanks for any help you can provide us with.

Craig M.

Subject: Skinner address list revised

Tom: This is a follow-up to the message I sent you last week requesting program support for updating our PRP mailing list at the Skinner SF Site. In addition to the PRPs listed in that message (i.e., Rohm and Haas, Diamond, AMF, Allied Signal), we need help finding an address for M and T Chemical. A package of info. we sent to them at an old address came back.

Thanks Tom,

Craig M.
